EXPERIENCE

Data analyst - UNED

February 2023 - January 2024 | Cartago

I performed data management tasks in SQL, including cleaning and displaying information through graphs, using statistical analysis tools such as Power BI to generate reports about the institution's problems.

Software Engineer - Legislative Assembly of Costa Rica

February 2022 - January 2023 | San Jose

I developed code in the UN SDG project for Costa Rica's 2023 agenda, using technologies such as C#, Python, JavaScript, HTML, CSS and managing Oracle Sql Developer and SQL Server databases. I contributed to the creation of the database model, created queries and managed stored procedures, triggers, roles and users.

EDUCATION

Universidad Estatal a Distancia (UNED)

Bachelor's Degree in Computer Engineering

January 2022- February 2025

- Mastery of databases and knowledge of Big Data.
- Familiarization in Cloud Computing.
- Web application design.
- Design of scalable systems.

Cartago University College (CUC)

Diploma in Information Technologies

January 2020- August 2022

- Handling programming languages (C# / Python / Java)
- Database Domain (Oracle Database, SQL Server)
- RESTful API management

Certifications

Scrum Foundation Professional Certificate SFPC - CertiProf

AWS Cloud Practitioner Essentials - Amazon (Actually studying)

APTITUDES

- Collaborative work.
- Autodidact.
- Framework Management

TECHNICAL SKILLS

Databases: Basic / Advanced Queries, Triggers, Stored Procedures, Roles and Users:

- Sql Server
- Oracle Database
- MySql

Programming

languages:OOP, Framework Management, Good Practices, Design Patterns, Creation of web, desktop and microservices applications:

- C# (Preferred)
- Python
- JavaScript (React/Angular)
- Java

LANGUAGES

Native Spanish

English (B2)

Learning at the North American Cultural Center.
