Cartago, Costa Rica

OBJECTIVE

Computer Engineer with experience in the development and support of systems. I am looking for an opportunity to apply my knowledge in Cloud Computing technologies, learn new tools and contribute effectively to innovative projects.

EXPERIENCE

Computer Engineer – MAS Group.

June 2024 - Present | San José, Costa Rica

- I developed **internal applications** using **Visual Studio** with **C#** and **React**, focused on migrating **legacy systems** to modern solutions by creating key modules. I implemented **Microsoft OAuth 2.0** to secure access to **cloud** resources and protect user authentication. In addition, I worked with **databases** to optimize data handling and querying, improving **operational efficiency, security, and scalability** of systems.
- I provided **outsourcing services** to **Grupo Monge**, developing internal modules to **optimize operational efficiency** and improve the user experience in their central system. I used **Azure DevOps** to manage projects in the **Azure cloud**, implementing agile workflows and improving collaboration between development teams. In addition, I managed **SQL Server databases** distributed in several countries, ensuring **high availability** and **performance**, which allowed an efficient and uninterrupted operation.

EDUCATION

State Distance University (UNED)

January 2022- April 2025

Bachelor's **Degree** in **Computer Engineering**

University College of Cartago (CUC)

January 2020- August 2022

Graduate of the **Diploma** in **Information Technologies**

KNOWLEDGE

- **Databases:** SQL Server, MySQL (optimization, modeling and queries).
- **Backend:** .NET Core, RESTful microservices, MVC and N-Capas architecture, OAuth 2.0.
- **Frontend:** React.js, UI/UX,
- **Cloud Computing:** Azure, Azure DevOps (CI/CD, governance, and security).
